7. On-line certificate on climate change: From learning to action: From UNCC: Learn E-courses.

CAREER OBJECTIVES

- To be an outstanding professional researcher in livelihoods and resilience intervention projects in order to improve the livelihoods of small holder and rural farmers.
- To be a competent professional in advisory extension services delivery to improve livelihoods of small holder farmers.

WORK EXPERIENCE

Period/Duration: 18th/September/2025 – Present.
Organization/Institution: Busitema University, Arapai Campus, Faculty of Agriculture and Animal Sciences.
Position/Designation: Senior Graduate Fellow

Key responsibilities:

- Teaching students, developing on-line courses and institutional materials.
- Setting, invigilating, and marking assignments, course works and exams.
- Research grants writing, research proposals and manuscripts development.

Period/Duration: 02nd/January/2025 – 31st/December/2025.
Organization: World Vision Uganda.
Location: Arua; West Nile (Bidibidi and Rhino camp Refugee settlements).
Position/Designation: Project Officer – Animal Production (Self Reliance Model project- WFP funded project).
Key responsibilities:

- Project implementation and sustainability by carrying out the following roles.
 - Providing technical advice on good agricultural practices aimed at improving agricultural productivity, with preference on small ruminants, and poultry with emphasis on climate smart agriculture (CSA) principles.
 - Train participants on key project models and approaches such as; Saving for Transformation (S4T), Transition, Gender Action Learning systems (GALs), and Local capacities for peace (LCP).

- Link target participants' groups to other life skills trainings besides economic and income generating activities (IGA). Also develop business plans for these income generating activities.
 - Promote climate smart agriculture practices and techniques through trainings, provision of advisory extension services and facilitate establishment of demonstration sites as learning and multiplication spots for farmers so as to transform target participants from subsistence to commercial agriculture in line with GoU policy on commercialization of Agriculture.
 - Develop concept notes, budgets and work plans for project activities while observing strict deadlines.
- Documentation, reporting and knowledge management by; **i)** Conducting regular follow up field visits to track the progress of ongoing activities, **ii)** Compiling comprehensive monthly and quarterly progress and specific activity reports, **iii)** Participating in monthly financial reviews, including realization of activities versus budget utilization, **iv)** Documentation and sharing of impact/success stories and best practices to promote learning.
 - Community engagement and advocacy through mobilization, facilitation and engagement of different stakeholders during planning, implementation and monitoring of project implementation in order to enhance stakeholder engagement, networking and collaboration.

Period/Duration: 06th/May/2024 – 30th/July/2024.

Organization: The Palladium Group Uganda (Climate Smart Jobs/CSJ Project – FCDO/UKAID funded project).

Location: Gulu.

Position/Designation: Interventions Manager (Livestock Production-Market systems development).

Key responsibilities:

- Formulate strategic interventions and develop concept notes in the selected work packages as per the Climate smart jobs (CSJ) strategy.
- Collaborate with the technical team to develop business cases and pitch them to the CSJ board.
- Ensure appropriate communication of clear intervention guidelines, expected outcomes, timeframe, and work plan to all relevant parties.
- Assist the Market Managers in the development of relevant grant agreements, MoUs, ToRs, and any other administrative requirements for the interventions.
- Conduct regular field visits to ensure proper implementation of activities while coordinating relevant sectors in market systems development and commodity chains.
- Work with monitoring and evaluation team to design appropriate tools for monitoring the progress of interventions within the various market sectors and conduct assessments for work packages.
- Help identify failures and pressure points for addressing any deviations and suggest decision options on such deviations.

Period/Duration: 08th/Oct/2018 – 31st/May/2024.

Organization: Welthungerhilfe Uganda. (BMZ funded project- Cross border project)

Location: Moroto.

Position/Designation: Expert Technical and social issues-Livestock Officer.

Key responsibilities:

- Provision of technical guidance and trainings on Agricultural practices to target participants' farmer groups and project community structures such as community animal health workers (CAHWs), livestock traders' associations, early warning structures (EWS), Agro-Pastoral farmer field school facilitators, among others.
- Coordination and collaboration with other relevant stakeholders in the Agricultural sector particularly other development partners (NGOs) in the region such as VSF-B, FAO, Mercy corps, CRS, C&D, etc. and the district local government structures at all levels to ensure project sustainability.
- Supervise, monitor, and evaluate livelihood field activities, such as skilling enterprises (Apiary/beekeeping, poultry management, off season vegetable production), including veterinary interns to identify any capacity and training gaps in order to ensure effective allocation and utilization of project resources.
- Develop concepts, budgets and work plans to guide in specific and timely project implementation to achieve target deliverables.
- Collecting, validating, and keeping track record on data of program target participants to inform programming through timely monthly and activity reports and work plans.
- Demonstrate innovative interventions on timely basis to ensure continued improved livestock productivity and income levels among benefiting households (e.g., bee keeping in some farmer groups,); communal livestock mass spraying against external parasites, mass deworming against internal parasites, natural resource management aspects like pasture and water preservation technologies, rangeland management (i.e., re-seeding of degraded rangelands, establishment of contour bands, etc.), among others.
- Perform any other duty as may be assigned.

Period/Duration: Feb – July 2018.

Organization: Mercy Corps Uganda (USAID Funded project).

Location: Kotido.

Position/Designation: Livestock program Officer.

Key responsibilities:

- Give technical advice to the program team on the livestock interventions that best suit the pastoral agro-ecological zone such as well adaptable livestock breeds, water and feed preservation measures, rangeland and management interventions, livestock restocking procedures and measures, with emphasis on small ruminants (goats and sheep).
- Support the re-stocking process of the project target participants with small ruminants (goats and sheep) in terms of suitable breed identification, procurement process, verification, inspection, vaccination and distribution to target participants.
- Collaborate and partner with the district local government, particularly the production department to ensure project sustainability.
- Carryout sensitization monitoring visits to backstop the target participants on the animal husbandry practices and to document any success stories for donor reporting.
- Compile and submit weekly and monthly reports to project coordinator and participate in monthly review workshops to guide in programing.

Period/Duration: May – July 2017.

Organization: Concern Worldwide.

Location: Nakapiripirit.

Position/Designation: Animal Health Trainer (consultant).

Key responsibilities:

- Train farmer groups on livestock husbandry practices such as Livestock housing, feeding, breeding, disease diagnosis, basic treatment, vaccination, Parasites/vector control, Pasture and rangeland management, reporting channels, etc.
- Prepare budgets and activity work plans as per the TOR in the contract offer.
- Compile and submit activity reports at the end of every milestone as indicated in the contract TOR.

PERSONAL COMPETENCES

- I like challenging tasks, result oriented while hitting deadlines.
